DISPLAY CONCEPTS

Ultra-bright sunlight-viewable ATM display

High-performance drop-in replacement monitor for NCR, Diebold, Fujitsu and Wincor-Nixdorf ATMs

Replace or upgrade your old 8.4" LCDs or 10" CRTs with new ultra-bright sunlight viewable LCDs only from Display Concepts.

Brighter, shaper text and images

Featuring a power-efficient LED backlight and superior 600:1 contrast ratio, this display provides exceptional readability in any viewing conditions – even direct sunlight.

It connects easily to our optional light sensor board or to the built-in light sensor in Diebold ATMs. With this feature the display automatically adjusts brightness in response to ambient lighting conditions, for optimum viewing both night and day.

Longer lasting, more power-efficient

Save energy and money with a display that's designed and built to last. Our high-performance LED backlight and ballast is designed for low power consumption and long life. The internal cooling fan is temperature-controlled to run only when needed, further conserving power and extending the life of the display.

Field service personnel will appreciate the light 4.5 lb weight.
