- **Low power use**
- **Long life**
- **Economical**
- **Brackets for drop-in replacement in NCR, Diebold, Fujitsu and Wincor-Nixdorf ATMs**
For ATM model compatibility visit Display-Concepts.com

Economical drop-in replacement monitor for NCR, Diebold, Fujitsu and Wincor-Nixdorf ATMs

Replace or upgrade your old 8.4" LCD or 10" CRT with this economical, high-brightness LCD from Display Concepts.

Brighter images, no screen burn

At 450 nits, these high-quality displays are much brighter than cheaper LCDs (typically 250 nits) or old CRTs (100 nits) on the market. Unlike CRTs, these displays will not degrade over time due to screen burn.

Longer lasting, more power-efficient

Save energy and money with a display that's designed and built to last. For example, our temperature-controlled internal cooling fan runs only when needed, conserving power and extending the life of the display.

Field service personnel will appreciate the light weight: only 4.5 pounds.

Shipping from stock

Display Concepts monitors ship from western New York, where they are designed and manufactured by our parent company, Z-AXIS. For more than 20 years, Z-AXIS has provided high-quality video display and electronic products engineered for long life in demanding applications.
